## Megan Mashburn

Address: Atlanta, GA / Open to Relocate: Phone: (706) 455-7075: Email: megandmashburn@gmail.com

LinkedIn: <a href="https://github.com/in/megan-mashburn-075598194">https://github.com/in/megan-mashburn-075598194</a> : Github: <a href="https://github.com/MyCloudAtl">https://github.com/MyCloudAtl</a>

### **Technical Skills:**

- Front-End: HTML, CSS, JavaScript (ES6+), React (Hooks: useState, useEffect, useContext, useNavigate), Axios, Responsive Design (Mobile First, Flexbox, Grid), Bootstrap
- Back-End: Express.js, Node.js, Django, Python, RESTful APIs, Mongoose, SQL, MongoDB(NoSQL)
- Tools: Version Control (Git), GitHub, Trello, Slack, Figma, Zoom
- Concepts: MVC Architecture, Responsive Design, Component Lifecycle, Props, Unidirectional Data Flow, Full CRUD Operations, ORM, DOM Manipulation, ERD, Component Hierarchy Diagrams, Web Performance Optimization

#### **Projects:**

## **Project Title: React Portfolio**

Sep 2024 - Oct 2024

<u>Technologies Used</u>: Bootstrap, CSS3, HTML5, JavaScript(ES6+), React.js, Vite, React Router, React Hooks (useState, useEffect), Body-Parser, CORS, Express.js, Morgan, Node.js

### **Key Features**:

- Developed a fully responsive professional portfolio which features modern design with intuitive navigation, enhancing user experience by improving usability.
- Enhanced user experience with animations via Framer Motion, adding engaging transitions and effects to components.
- Incorporated a contact form for easy communication using EmailJS, utilizing backend APIs for form submission.
- Utilized React Router for smooth seamless navigation between different sections of the portfolio.

## **Project Title: XploreATL**

Jul 2024

<u>Technologies Used</u>: Axios, CSS3, Font Awesome, HTML5, JavaScript(ES6+), Passport(Passport-Local & Passport-local-Mongoose), React.js, React Hooks (useState, useEffect), MongoDB, REST Framework for building APIs

### Key Features:

- Engineered a web application for discovering and exploring eateries in Metro-Atlanta.
- Integrated secure user authentication and authorization, including registration, login/logout functionality, and user profiles.
- Designed with scalability in mind, allowing for potential integration with maps, user reviews, and enhanced search features.
- Implemented features that allow users to mark their favorite places and bookmark locations for future reference, enhancing the exploration experience.

# (Group) Project Title: Health-Fit

Jun 2024

<u>Technologies Used</u>: Axios, Bootstrap, CSS3(Flexbox/Grid), HTML5, React.js, React-Big-Calendar(Date-fns & DatePicker), React Router, Body-Parser, Morgan, CORS, Express.js, MongoDB (Mongoose), Node.js <u>Key Features</u>:

- Built a full-stack web application enabling users to track and manage their personal health intake and fitness goals.
- Created full CRUD functionalities across front and backend for users to create, view, update, and delete health logs.

- Developed a RESTful API for seamless front-end and back-end communication, utilizing Axios for data fetching.
- Designed and implemented a responsive UI using React and Bootstrap for optimal user experience across devices.
- Utilized GitHub for version control and Trello for team collaboration and project management.

## **Professional Experience:**
